Faculty Teaching Effectiveness Analysis Framework

Note:

1. Identification of Slow learners and medium learners to be done within first 10 days of beginning of each semester.
2. TEA (Teaching Effectiveness Analysis) will be carried out only if the question paper quality is minimally "satisfactory" and valuation is properly done as per answer key, failing which TEA is rated as "Highly Ineffective" by default.
3. Faculty handling 3 different courses (under exceptional situation), TEA will be considered based on best two TEA for final rating. However, a minimum of "adequate" is expected in all courses.
4. Faculty contributing to significant improvement / outcomes from fast learner will be given additional consideration.
5. Overall pass % expected in a course in SE-I and SE-II can be decided based on TEC.

Teaching Effectiveness Analysis Component:

- I. Base line Outcome Score
- II. Learning improvement
- III. Teaching environment challenges

I. Base line outcome Score (P1): (Represent early teaching effectiveness)

- Immediately after SE-I
- Considered P1 and TEC

$$P1 = \frac{\text{No. of Slow Learners with more than 40\% marks in SE-I}}{\text{Total Slow Learners}} \quad (\text{If SL} \geq 40\%)$$

(or)

$$P1 = \frac{\text{(No. of SLs with more than 40\% marks in SE-I)} + \text{(No. of MLs with more than 60\% marks in SE-I)}}{\text{Total Slow Learners} + \text{Total Medium learners}} \quad (\text{If SL} < 40\%)$$

P1	Classification	Interpretation
≥ 0.65	Strong	Majority slow learners improved
$0.4 - 0.65$	Moderate	Coping early
< 0.4	Weak	Early learning gap evident

II. Learning improvement (P2): (Represent effect of pedagogical intervention)

- Immediately after SE-II
- Considered P2 and TEC

$$P2 = \frac{\text{No. of Slow Learners with +7 Marks in SE-II w.r.t SE-I}}{\text{Total Slow Learners}} \quad (\text{If SL} \geq 40\%)$$

(Or)

$$P2 = \frac{\begin{array}{c} \text{(No. of Slow Learners with +7 Marks in SE-II w.r.t SE-I)} \\ + \\ \text{(No. of Medium learners with +10 Marks in SE-II w.r.t SE-I)} \end{array}}{\text{Total Slow Learners} + \text{Total Medium Learners}} \quad (\text{If SL} < 40\%)$$

P2	Classification	Interpretation
≥ 0.5	Strong	Clear Improvement
0.3 – 0.5	Moderate	Moderate improvement
< 0.3	Weak	No clear Improvement

III. Teaching Environment Challenges (TEC):

(a) Student quality

1. Low Challenge (Avg. CGPA ≥ 6.5)
2. Moderate (Avg. CGPA 5.0 – 6.5)
3. High Challenge (Avg. CGPA < 5.0)

(b) Course Complexity

1. Low Challenge (Competency Simple/ Procedural)
2. Moderate (Moderate conceptual load)
3. High Challenge (Heavy matters / Abstract/ lengthy Syllabus)

(c) Faculty Experience

1. Low ≥ 3 -times Teaching
2. Moderate 2nd time Teaching
3. High 1st time Teaching

(d) Class Strength

1. Low (≤ 35)
2. Moderate ($\leq 35 - 60$)
3. High (≥ 60)

Average (TEC):

$$TEC = \frac{(a) + (b) + (c) + (d)}{4}$$

> 2.75	Highly Challenging
1.76 – 2.75	Moderate Challenge
<= 1.75	Low Challenge

Teaching Effectiveness considering P1 (or P2) and TEC

P1/P2	TEC	Classification (marks)
Strong	Highly Challenging	Highly effective (10)
	Moderate Challenge	Effective (8)
	Low Challenge	Adequate (5)
Moderate	Highly Challenging	Effective
	Moderate Challenge	Adequate
	Low Challenge	Ineffective (2)
Weak	Highly Challenge	Ineffective
	Moderate Challenge/ Low Challenge	Highly Ineffective (0)

IV. Final Faculty Effectiveness (Combining Effectiveness of P1 and P2)

S.No	Rating	Description
1.	> 8.5	Highly Effective
2.	7.0 – 8.5	Effective
3.	5.0 – 7.0	Adequate
4.	3.5 – 5.0	Partially Adequate
5.	2.0 – 3.5	Ineffective
6.	0 – 2.0	Highly Ineffective

V. Minimum Pass Percentage Recommended:

S.No	TEC Category	Recommended Pass Percentage	
		SE-I	SE-II
1.	Highly Challenge	70 % - 80 %	75% - 85%
2.	Moderate Challenge	80 % - 90 %	85% - 95%
3.	Low Challenge	90 % - 95 %	100%
